Introduction

About the Brand

More Life Nutrition is a Tunisian brand operating in the healthy food and functional snacks market. It offers products such as protein-rich chocolate cups (“Power Cups”) made from ingredients like nuts and dark chocolate, positioned as healthy, energy-boosting alternatives to traditional snacks.

The brand emphasizes:

- No added sugar or oils
- Plant-based protein sources
- Convenience + indulgence balance

This positions More Life Nutrition at the intersection of:

- ❖ Health-conscious consumption
- ❖ Fitness lifestyle
- ❖ On-the-go snacking

Objective of the Report

This report aims to analyze More Life Nutrition’s current position and growth potential by:

- Evaluating internal and external factors (**SWOT analysis**)
- Proposing a **targeted marketing strategy**
- Assessing the **digital ecosystem and presence**
- Defining **clear marketing and digital objectives**

How can More Life Nutrition scale its brand awareness and sales in Tunisia while maintaining a strong “healthy yet indulgent” positioning in a price-sensitive market?

SWOT Analysis – Power Cups (More Life Nutrition)

1-Strengths

Strength	Analysis
Niche Target Clarity	Aligns with the **growing health-conscious segment** (gym-goers, students, young professionals, conscious parents) seeking nutritious snacks (no sugar/palm oil). This aligns with the "Clean Label" vague..
Strong Visual Branding Potential	Cup format is portable, convenient, visually appealing for modern consumers, and differentiates from traditional snacks.
Local brand advantage	Better understanding of Tunisian consumers, lower costs, and easier local distribution.
High digital marketing potential	The product is visually attractive and suitable for social media promotion and influencer marketing.
Pricing Strategy	Alignment with competitors in terms of price while offering same/better quality.

2-Weaknesses

Weakness	Analysis
Low brand awareness	Limited recognition compared to established snack or fitness brands.
Weak digital presence	Lack of strong social media strategy, engagement, and paid advertising.
Limited product range	Few category variations reduce customer retention and expansion opportunities.
Low perceived differentiation	Seen as simple nuts that can be easily replaced by cheaper alternatives.

Limited distribution	Heavy reliance on niche "Bio" shops and specific supermarket chains (e.g., Ben Yaghlane), limiting national accessibility.

3-Opportunities

Opportunity	Analysis
Growth of fitness & wellness trend	Increasing demand for healthy snacks driven by gym culture and lifestyle awareness.
Digital channel expansion	Opportunity to scale through Instagram, TikTok, and influencer marketing.
E-commerce growth	Rising adoption of online shopping and delivery services in Tunisia.
Product line extension	Potential to introduce protein, diet-specific, or flavored variants.
B2B Digital Partnerships	Collaborating with gyms and CrossFit boxes through digital referral codes and affiliate marketing.

4-Threats

Threat	Analysis
Price Sensitivity of the Market	Healthy products are often seen as luxury, not necessity.
Competition from imported brands	Low barriers to entry in the snack market mean new local "copycat" brands could emerge with lower pricing. Imported brands may have stronger trust and wider product ranges
Irregular Purchase Frequency	A majority of Tunisians rarely buy premium healthy foods; frequent purchase rate is low (16% regular buyers). Unsteady sales and low brand loyalty mean

	More Life must continually acquire new customers; difficulties in sustaining volume.
Shopping Channel Preferences	Traditional grocers dominate snack sales, and many Tunisians have low online shopping budgets (over 40% spend <50 TND/month).
Demographic Preferences	Younger consumers (Gen Z) rely on influencers and social proof, while older shoppers value affordability. One-size marketing won't work: failing to engage youth online or address budget concerns of other groups could limit reach.

Marketing Strategy

1. Strategic Positioning

Core Positioning: "A guilt-free indulgence that fits your lifestyle."

The brand should live in the space between:

- Fitness discipline
- Everyday cravings

2. Target Segments

Primary Target:

- Young adults (18–30)
- Gym-goers / fitness beginners
- Urban, social-media active

Secondary Target:

- People trying to eat healthier (not necessarily athletes)
- Students & young professionals

Target **people who feel guilty when they snack**

3. Value Proposition

- Functional:

    - Protein-rich
    - No unnecessary additives
- Emotional:
    - “I can snack without guilt”
    - “I’m taking care of myself without sacrificing pleasure”

4. Core Marketing Pillars

1. Education

A big part of the market still doesn’t fully understand what makes this product different.

The brand should focus on simplifying the message: why it’s a better alternative to regular snacks, what “protein snack” actually means, and how it fits into everyday life.

The goal is to make healthy choices feel easy and obvious, not technical or complicated.

2. Lifestyle Branding

More Life shouldn’t just sell a product; it should represent a way of living.

The content needs to show the product in real-life moments: after a workout, during a study break, or when cravings hit.

This helps people see themselves using it, making the brand feel relatable and part of their routine.

3. Social Proof & Influence

Trust is key, especially for a product that claims to be both healthy and enjoyable.

The brand should rely on real people using and recommending the product; through influencers, user-generated content, and testimonials.

Seeing others enjoy it makes the product feel more credible and desirable.

4. Accessibility & Value Perception

Since the product may be seen as a low-priority, the strategy should focus on making it feel worth it.

This can be done through bundles, entry offers, or positioning it as a smart alternative rather than an extra expense.

The objective is to shift the perception from “ low-priority snack” to “valuable choice.”

5. Distribution Strategy

More Life should prioritize presence in high-relevance locations like gyms, fitness studios, and healthy cafés, where the product naturally fits the consumer's lifestyle. This increases both visibility and purchase intent.

Digitally, Instagram should drive discovery, while the website ensures a smooth and simple buying experience. Retail expansion can come later, but should remain selective to preserve the brand's positioning.

6. Growth Moves

Growth should focus on consistent visibility through a clear "snacking without guilt" message. Micro-influencer collaborations can help build trust and make the product feel relatable.

Limited editions and new flavors can create excitement and encourage repeat purchases, while recurring content formats keep the audience engaged over time.

Digital Marketing Objectives

Objective 1 : Increase Brand Awareness on Social Media

Objective	Grow More Life Nutrition's social media presence (Instagram & TikTok) by 30% within 6 months.
KPI	Number of followers, reach per post, impressions
Timeline	6 months
Strategy	Consistent content posting (4-5x/week) using lifestyle visuals and short-form videos. Partner with Tunisian micro-influencers in fitness and wellness. Run targeted paid ads aimed at urban audiences aged 18-30.

This directly addresses the brand's weak digital presence identified in the SWOT analysis and supports the lifestyle branding marketing pillar.

Objective 2 : Drive Traffic to the Online Store

Objective	Increase monthly visits to the brand's website or online store by 40% within 6 months.
KPI	Monthly website sessions, click-through rate (CTR) from social media
Timeline	6 months
Strategy	Add direct purchase links on Instagram and TikTok bio. Optimize product pages with relevant French and Arabic keywords (e.g., 'snack sain Tunisie', 'cup protéiné'). Run Google Ads campaigns for local searches.

Aligned with the e-commerce growth opportunity in Tunisia and the distribution strategy that prioritizes Instagram as the main discovery channel.

Objective 3 : Boost Online Sales and Conversions

Objective	Achieve a 15% increase in online orders within 6 months.
KPI	Number of online orders, conversion rate, average order value
Timeline	6 months

Strategy	Launch limited-time promotions on Instagram Stories and Facebook Ads. Retarget users who visited the store but did not purchase. Offer a first-order discount for new customers to reduce price-sensitivity friction.

This responds to the price sensitivity threat and the accessibility & value perception pillar - making the product feel worth it through smart promotional tactics.

Objective 4 : Build Community Engagement

Objective	Reach an average engagement rate of 5% on Instagram and TikTok within 3 months.
KPI	Likes, comments, shares, saves, story interactions per post
Timeline	3 months
Strategy	Launch a user-generated content (UGC) campaign: encourage customers to share their 'Power Cup moment'. Run polls, Q&As, and fitness challenges. Feature real customer testimonials to build credibility and social proof.

Directly supports the social proof & influence marketing pillar. Authentic content from real users strengthens trust, which is essential for a product claiming both health and taste benefits.

Objective 5 : Establish B2B Digital Partnerships

Objective	Secure 5 active digital partnerships with gyms or fitness studios in Tunisia within 6 months.
KPI	Number of partnerships, referral code uses, partner-generated content
Timeline	6 months
Strategy	Collaborate with CrossFit boxes, gyms, and fitness coaches through affiliate codes and co-created content. Offer exclusive discounts for their community members to drive trial and word-of-mouth.

This activates the B2B digital partnerships opportunity from the SWOT analysis, and expands distribution reach beyond niche bio shops to high-relevance fitness locations.

Objective 6 : Grow and Retain a Loyal Customer Base

Objective	Build an email and/or WhatsApp subscriber list of 500+ contacts and maintain a 25% open/read rate within 6 months.
KPI	Subscriber count, open rate, repeat purchase rate
Timeline	6 months
Strategy	Offer a first-purchase discount in exchange for newsletter sign-up. Send bi-weekly nutrition tips, product launches, and exclusive offers. Use WhatsApp broadcast

	lists for direct, personal communication with existing customers.

Supports long-term customer retention and addresses the limited product range weakness by keeping customers informed of new releases and variations.

Summary

These six digital marketing objectives provide More Life Nutrition with a structured roadmap to grow its online presence, convert its target audience into loyal customers, and strengthen its brand positioning in a competitive and price-sensitive Tunisian market. Each objective is realistic, measurable, and directly connected to the brand's current context and marketing strategy.

Digital Context Analysis

1.Current Digital Presence

More Life Nutrition has established a basic but relevant digital presence through its Instagram account and e-commerce website, which currently represent the brand's main communication and sales channels. Instagram is used to showcase the products and build brand visibility, while the website allows direct online purchasing and presents the available product range.

The website currently includes several products such as Power Cups, bundles, and gift sets, as well as practical features such as online cart integration, free delivery from 99 DT, and links to social media platforms. This shows that the brand already operates within a direct-to-consumer digital model, where product discovery and purchase can happen online.

2.Situation Analysis

The digital strategy begins with a situation analysis answering the question: **"Where are we now?"** In the case of More Life Nutrition, the brand appears to be in a **digital growth phase**. It has a strong product concept and a digital sales infrastructure, but still lacks a fully structured digital strategy to optimize visibility, engagement, and conversion.

Its products are well adapted to digital marketing because they are:

- Visual and attractive.
- Easy to promote through social media.

- Connected to current health and fitness trends.

However, being present online is not enough. The brand must ensure that its digital communication is clear, engaging, and convincing.

3.Digital Micro-Environment

The **micro-environment** includes the immediate actors influencing the brand's digital performance, especially customers, competitors, and digital platforms.

Digital Customers

More Life's digital audience is likely composed of **young, connected, and health-conscious consumers**, particularly those interested in fitness, healthy eating, and lifestyle content. These consumers are generally informed, socially influenced, and likely to compare products before making a purchase.

Consumer Behaviour

The customer journey is strongly influenced by digital habits such as:

- Searching for product information.
- Comparing alternatives.
- Checking reviews or recommendations.
- Discovering brands through social media.

This means that digital channels play an important role not only in sales, but also in **education and trust-building.**

Competitors

In the digital space, More Life competes not only with healthy snack brands, but also with:

- Traditional snacks.
- Imported products.
- Fitness and wellness brands.
- Lifestyle content is competing for the same attention.

As a result, the competition is not only product-based, but also **content-based**.

Digital Platforms

The brand mainly relies on:

- **Instagram** for awareness and engagement.

- **The website** for conversion and online purchase.
- Secondary channels, such as **TikTok and Facebook,** for additional visibility.

This creates a promising digital ecosystem, but also requires consistent and strategic management across all channels.

4.Digital Macro-Environment

The **macro-environment** refers to the broader external factors influencing the brand, particularly social, technological, economic, and legal factors.

Social Factors

The social environment is favorable, as there is a growing interest in:

- Healthier lifestyles.
- Fitness culture.
- Balanced eating habits.

However, some consumers may still perceive healthy snacks as either expensive or less satisfying than traditional alternatives.

Technological Factors

The rise of mobile browsing, e-commerce, and short-form content strongly supports More Life's business model. Consumers are increasingly discovering and buying products directly through digital channels.

Economic Factors

The economic environment remains a major challenge. Tunisia is a **price-sensitive market**, and healthy snacks are often perceived as premium or non-essential products. This makes value communication and pricing strategy particularly important.

Legal and Ethical Factors

As a food-related brand, More Life must ensure responsible communication, especially regarding:

- Nutritional information.
- Product benefits.
- Health-related claims.

Clear and transparent messaging is essential to maintain consumer trust.

Political Factors

Policies encouraging local entrepreneurship and domestic production can support the growth of More Life Nutrition by reducing reliance on imports. However, administrative complexity and regulatory procedures may slow down expansion or product approvals.

Overall, the brand benefits from being locally positioned, but must remain compliant with evolving regulations.

Environmental Factors

Environmental considerations are becoming increasingly important, particularly among health-conscious consumers. There is a growing awareness of sustainability, natural ingredients, and environmentally responsible consumption.

More Life Nutrition's use of plant-based ingredients aligns positively with this trend and can strengthen its positioning as a conscious and responsible brand. However, packaging, especially if it involves single-use materials, may raise concerns among environmentally aware consumers.

5.Digital Customer Journey

The course highlights the importance of understanding the **customer journey** and the different digital touchpoints influencing the buying decision.

For More Life Nutrition, the journey can be summarized as follows:

- **Awareness:** the customer discovers the brand through Instagram, influencer content, or word-of-mouth.
- **Consideration:** the customer explores product visuals, ingredients, prices, and benefits.
- **Conversion:** the customer visits the website and decides whether to purchase.
- **Retention:** if satisfied, the customer may repurchase, recommend the brand, or engage again online.

This confirms that digital marketing must support the customer at each stage of the purchase process.

6.Key Digital Diagnosis

Overall, More Life Nutrition operates in a favorable digital environment and benefits from a product that is naturally compatible with digital marketing. Its main strengths lie in its visual appeal, online accessibility, and alignment with current wellness trends.

However, the brand still needs to strengthen its digital strategy in order to:

- Increase brand awareness.
- Better educate consumers.
- Improve value perception.
- Convert interest into repeat purchases.

In this sense, the digital context offers strong growth potential, provided that the brand adopts a more structured and performance-oriented approach.

3. Digital Strategy – RACE Framework

More Life Nutrition

The RACE Framework provides a structured digital marketing strategy that guides More Life Nutrition through the full customer journey: from attracting new audiences to building long-term loyalty and repeat purchases.

This framework ensures that every digital action from SEO optimization to social media storytelling and subscription systems contributes to measurable business objectives.

1. REACH (Attract New Customers)

Increase brand visibility and position More Life Nutrition as a premium yet accessible healthy snack brand within the Tunisian market.

At this stage, the focus is on maximizing awareness through SEO, social media visibility, influencer partnerships, and culturally relevant content.

Tools Used & Strategic Actions

- **SEO & Discoverability**
- **Social Media Awareness**
- **Influencer & Partnership Strategy**
- **Paid Awareness Campaigns**

Main Goal: Awareness

Objectives

- Increase social media reach by **30% in 6 months**
- Increase impressions among the target audience aged **18–30**
- Build strong brand recognition in the healthy snack category

2. ACT (Encourage Interaction)

Transform visibility into engagement by encouraging users to interact with the brand, explore products, and emotionally connect with the More Life experience.

This stage focuses on immersive storytelling, educational content, and interactive digital experiences that reduce hesitation and increase curiosity.

Tools Used & Strategic Actions

- Interactive Website Experience
- Social Media Engagement
- Educational & Trust-Building Content
- User-Generated & Influencer Content

Main Goal: Engagement

Objectives

- Achieve a 5% engagement rate across platforms
- Increase website visits by 40%
- Increase product page interaction and time-on-page
- Improve customer understanding of nutritional benefits

3. CONVERT (Turn Interest into Purchase)

Convert engaged visitors into paying customers through a seamless, premium, and mobile-optimized purchasing experience.

Since the Tunisian market is price-sensitive, the conversion strategy focuses on reducing purchase hesitation while increasing perceived value.

Tools Used & Strategic Actions

- E-Commerce Optimization
- Conversion Offers
- Performance Marketing
- Trust Signals

Main Goal: Sales

Objectives

- Increase online orders by 15%

- Improve website conversion rate
- Reduce cart abandonment
- Increase subscription-based recurring purchases

4. ENGAGE (Build Loyalty & Retention)

Develop long-term relationships with customers by creating an active brand community, personalized communication, and repeat-purchase systems.

Retention is essential for More Life's growth strategy because recurring customers increase long-term profitability and brand advocacy.

Tools Used & Strategic Actions

- Retention & Loyalty Systems
- **Community Engagement**
- Personalized Communication
- Advocacy & Social Proof

Main Goal: Loyalty / Retention

Objectives

- Increase repeat purchases by 20%
- Build a strong subscriber base
- Maintain high newsletter engagement rates
- Increase customer advocacy and word-of-mouth recommendations

Final Strategic Vision

The RACE strategy positions More Life Nutrition as more than a healthy snack brand.

By combining:

- Technical SEO excellence,
- Premium visual storytelling,
- Interactive website experiences,
- Social-media-driven community building,
- And subscription-based retention systems,

More Life can create a scalable digital ecosystem capable of driving sustainable awareness, engagement, conversion, and long-term customer loyalty within the Tunisian wellness market.

Customer Journey Map

1. Awareness Stage

At the awareness stage, both personas are exposed to the brand through different digital touchpoints:

- **Yasmine:** Discovers More Life Nutrition through an Instagram reel showcasing a beginner-friendly fitness transformation.
- **Karim:** Encounters a targeted Facebook advertisement after searching for “healthy snacks Tunisia.”

This stage is driven by social media visibility and targeted digital advertising.

2. Consideration Stage

At this stage, both users actively evaluate the brand and its products:

- **Yasmine:** Visits the Instagram page, explores product descriptions, and feels reassured by the local Tunisian positioning and accessible pricing.
- **Karim:** Reviews ingredients, compares the product with his usual snacks, and looks for social proof such as testimonials and reviews to validate taste and quality.

This stage is primarily influenced by trust, clarity of information, and perceived value.

3. Purchase Stage

The purchase decision is made with different motivations:

- **Yasmine:** Orders a starter protein bundle online, encouraged by a first-time purchase discount and her motivation to start her fitness journey.
- **Karim:** Chooses a low-commitment sample pack, either in-store or via delivery, allowing him to test the product without risk.

This stage is driven by accessibility, pricing incentives, and reduced friction.

4. Loyalty Stage

After the initial purchase, both personas transition into retention behaviors:

- **Yasmine:** Shares her experience on social media, tags the brand, and gradually becomes a micro-advocate within her network.
- **Karim:** Repurchases his preferred flavors and may recommend the product to colleagues or peers.

Retention is supported through loyalty incentives, consistent content engagement, and sustained product satisfaction.

1. WEBSITE UX & SEO OPTIMIZATION

1.1 Technical SEO Foundation

Objective : Build a technically optimized website that satisfies Google's Core Web Vitals standards while ensuring a seamless mobile-first experience for Tunisian users.

RACE Contribution : REACH

-> The website must prioritize speed, responsiveness, and visual stability to improve discoverability and user retention. Luckily , More Life Style Nutrition passes the LCP , CLS and Mobile First Indexing tests .

1.2 On-Page SEO & Content Optimization

Objective Position More Life as a top-ranking healthy snack brand for high-intent Tunisian searches.

RACE Contribution: REACH

Execution Strategy

1. **Bilingual SEO Strategy**

Implement a French-English keyword structure using `hreflang` tags to capture multilingual search behavior.

Examples:

- "Healthy snacks Tunisia"
- "Snacks sains Tunisie"

2. **Semantic Content Expansion**

Avoid thin product pages by integrating:

- Nutritional explanations
- Ingredient storytelling
- Health-focused semantic keywords

Examples:

- Low glycemic index
- Natural sweeteners
- Energy-boosting snacks

3. **E-E-A-T & YMYL Optimization**

Strengthen credibility through:

- Expert-backed nutrition sections
- Ingredient transparency
- Specialist-written health explanations

This increases trust while complying with Google's health-content standards.

1.3 Off-Page SEO & Brand Authority

Objective : Increase domain authority and brand trust through high-quality external visibility.

RACE Contribution: REACH

Execution Strategy

1. **Nutritionist Partnership Strategy :**

Launch the **"Power Morning Challenge"** in collaboration with Tunisian nutritionists and wellness creators.

Deliverables include:

- Guest blog articles
- Social reposts
- Backlinks from trusted wellness sources

2. **Local SEO Optimization**

Create and optimize a Google Business Profile in Tunis to appear in local "healthy food near me" searches.

1.4 Interactive Website Experience (UX)

Objective : Transform the website from a transactional platform into an immersive discovery experience that increases engagement and conversion rates.

A. 3D Ingredient Motion Scroller

Concept: A high-end motion design experience where ingredients visually deconstruct during scrolling to reveal nutritional information.

Objective: Increase time spent on the website while transforming nutrition data into visual storytelling.

RACE Contribution: ACT

Execution Style

As users scroll:

- Almonds, dates, pistachios, or hazelnuts separate into animated layers
- Nutritional benefits appear progressively
- Product ingredients become visually interactive

This creates a premium digital identity while improving user engagement metrics.

B. Subscription Model — Monthly Discovery Box

Concept: A recurring monthly healthy snack subscription.

Objective: Increase customer lifetime value (LTV) while generating recurring revenue.

RACE Contribution: CONVERT / ENGAGE

Execution Style

Users can subscribe to:

- Monthly discovery packs
- Exclusive flavor drops
- Limited-edition combinations

The subscription model removes purchasing friction and encourages long-term retention.

2. OMNICHANNEL SOCIAL MEDIA STRATEGY

2.1 TikTok — The Discovery Engine

Objective: Generate rapid brand awareness through relatable, authentic short-form content.

RACE Contribution: REACH

Execution Strategy

"The Realistic Wellness Journey"

Content centered around the reality of maintaining healthy habits in Tunisia.

Examples:

- Busy student routines
- Campus snack swaps
- Gym-to-class transitions

Street-Level Engagement

Produce “Man on the Street” taste-test videos at Tunisian universities to increase authenticity and relatability.

2.2 Instagram — Premium Brand Storytelling

Objective: Build a premium visual identity that justifies the brand’s positioning.

RACE Contribution: ACT / CONVERT

Execution Strategy “Inside the Cup” Ingredient Storytelling

Use:

- Macro photography
- Real textures
- Technical hand-drawn ingredient sketches
- Cinematic transitions

The objective is to visually prove quality while making healthy snacks feel indulgent and desirable.

Tunisian Lifestyle Integration

Introduce culturally relevant positioning such as:

- Summer-friendly snacks
- Energy-focused wellness content

2.4 Facebook — Community & Retention

Objective: Strengthen customer loyalty through community interaction.

RACE Contribution: ENGAGE

Execution Strategy

“The Mystery Flavor Poll”

Interactive community voting campaigns where users choose future flavors inspired by Tunisian ingredients.

Examples:

- Zgougou
- Deglet Nour
- Walnuts

This strategy increases emotional investment in the brand while encouraging repeat interaction.

2.5 Weekly Content Calendar

Day	Platform	Objective	RACE Stage	Content Theme
Monday	TikTok / Reels	Awareness	Reach	“Gym Bag Essentials for 10DT”
Wednesday	Instagram	Engagement	Act	3D Ingredient Motion Content
Thursday	Stories	Community Interaction	Engage	Flavor Poll & Waitlist
Friday	Facebook / Instagram	Conversion	Convert	Weekend Bundle Promotion

3. ADS STRATEGY

3.1 “Desk-Side Hack” Campaign

Target: Young professionals and office workers.

Objective: Position More Life as a practical solution for afternoon energy crashes.

RACE Contribution: CONVERT

Execution Style

Visual transition:

- Fatigued employee during the afternoon slump
- Product consumption moment
- Return to focus and productivity

Platforms

- Instagram Stories
- Reels

CTA: “Upgrade Your Office Snack.”

3.2 “Inside the Cup” Campaign

Target: Both students and professionals.

Objective: Build premium perception while proving product quality visually.

RACE Contribution: ACT / CONVERT

Execution Style

High-production macro visuals:

- Chocolate cracking open
- Ingredients emerging dynamically
- Hand-drawn ingredient overlays
- Cinematic slow-motion transitions

Platforms

- TikTok Top View
- Instagram Feed

CTA: "Taste the Revolution."

3.3 "Day in My Life" Campaign

Target: Students and active consumers.

Objective: Reduce price resistance by reframing the product as an accessible daily upgrade.

RACE Contribution: CONVERT

Execution Style

- More Life snack value
- Minimal clean visuals
- Quick educational messaging

Platforms

- Instagram Stories
- Reels

CTA: "Start Your Journey for Less."

Final Strategic Objective

The overall strategy aims to achieve:

- **30% increase in organic traffic**
- **20% increase in repeat purchases within six months**

This growth will be driven by combining:

- Technical SEO excellence

- High-end digital storytelling
- Immersive UX experiences
- Culturally relevant social media communication
- Performance-focused conversion strategies

Conclusion

More Life Nutrition demonstrates strong potential to become a leading healthy snack brand in Tunisia. Its strengths lie in its product appeal, strong visual identity, and alignment with current wellness trends.

However, its growth is currently limited by weak digital structuring, low brand awareness, and insufficient engagement strategies.

The proposed strategy provides a complete roadmap combining SEO, social media, UX innovation, and performance marketing to transform More Life Nutrition into a scalable digital-first brand.

Success will depend on consistent communication, strong brand storytelling, and the ability to balance accessibility with premium positioning in a price-sensitive market.
